

# Compressed Air Systems Open Rotary Screw Compressors

## 40 HP NK100/EVO Elite Series

- A** Vibration isolation pads-saves wear & tear on the tank & makes installation easier, reduces vibration & noise
- B** Simple load/unload operation- compressor controls are reliable with common components (no computer systems to fail, or proprietary parts)
- C** Standard common motor contactor-for reliability and ease of maintenance (no computer system to fail)
- D** Easy access operational controls
- E** Compressor control panel UL cUL 508 508a certified on request
- F** Air/oil cooler mounted to the outside of the fan guard for easy maintenance resulting in lower cost of ownership
- G** Industrial grade motor
- H** Single common solenoid control-easy to maintain, simple operation and lower cost of ownership
- I** Easy access air filter-cuts down on maintenance time lowering the cost of ownership
- J** Encapsulated air end –allows for a smaller foot print & lower total oil capacity, allows for a lower cost of ownership.
- K** Easy access spin on separator-cuts down on maintenance time lowering the cost of ownership
- L** Easy access oil filter-cuts down on maintenance time lowering the cost of ownership
- M** Easy access oil drain-less maintenance time lowering the cost of ownership
- N** Automatic tank drain-the tank is drained daily for you
- O** Compressor tank ASME/CRN powder coated 200 psi working pressure rated

**The lowest cost of ownership of any rotary screw compressor**

## Compressed Air Systems

Simplicity. It's What We Do.
